

*Spring Pool Care
Guidelines*

Spring is around the corner.

As the days are getting warmer, make sure you have everything you need to get your pool swim-ready for summer.

Follow the guidelines below to ensure your pool is ready for the season.

- Clear leaves from pump and weir basket
- Backwash and rinse the filter every 2 weeks.
- Increase filtering time to 8 hours per night. Small pools (<30 000l) 4 hours per night
- Inspect your automatic pool cleaner (APC) at the beginning of the season.
- Clean your filter sand using HTH® Colour Indicator Filter Sand Cleaner
- Test your water levels once a week.
- Sanitise by adding HTH® Granular+ Mineralsoft™ daily or every second day depending on your chlorine demand, or add an HTH® Floater and supplement with HTH® Granular+ Mineralsoft™ chlorine as needed.

Sanitisers

Steer clear of germs and bacteria by using HTH® Sanitisers. Sanitisers work best with the correct pH level.

HTH® Granular+ Mineralsoft™
8kg

HTH® Granular+ Mineralsoft™
15kg

HTH® Shock It™
500g

Floaters

Simply add a floater for hassle-free pool care convenience. Remember to test your water weekly.

HTH® Floater+
1.6kg

HTH® Pace Floater™
1.5kg

HTH® Non-Stabilised Floater
1.5kg

Pool Maintenance Products

The perfect complement to your pool sanitisers. Test the pool water on a weekly basis to maintain the correct levels.

HTH® SCIENTIFIC™

MINI RESERVOIR FLOATER

Water sanitation solutions from the manufacturers of

A trusted brand in sanitation of drinking water

International NSF Std 060 certification for use in drinking water

A simple solution for water disinfection in storage tanks ranging from 5,000 to 20,000 litres

Features

- ✓ One unit contains 600g of calcium hypochlorite
- ✓ Easy to use
- ✓ 2-year shelf life when stored correctly
- ✓ Compact disposable floater packaging

Mini Reservoir Floater

Small yet powerful! The Mini Reservoir Floater is an effective bactericide and fungicide for the disinfection of potable water in smaller storage tanks.

Always measure chlorine content of water before use or ingestion - maintain a chlorine residual of less than 4.0 mg/L. HTH® Early Warning Test strips can be used for testing.
